The logo for SGS, consisting of the letters 'SGS' in a bold, sans-serif font. The letters are dark grey. A thin orange vertical line is positioned to the right of the 'S', and a thin orange horizontal line is positioned below the 'S' and 'G'.

TO WHOM IT MAY CONCERN

We have been using AGR Technology Design's Advanced Ultrasonic Test Equipment since April 2008 and we are very happy with its performance and capabilities.

We are very happy with the TD Handy Scan 64/32 system. Our NDT personnel find it easy to use, extremely flexible and with good analysis tools. Being able to use TOFD and Phased Array simultaneously is a huge advantage to us.

It provides a good platform for us in the field of semi-automated ultrasonic testing.

We use the equipment in an IP67 housing in a very harsh environment and for 12 hours in a day.

The units work very well under these conditions.

The AGR Customer service is excellent – Turn round for new equipment and calibrations/repairs is fast.

Having your queries answered in a timely manner is important to us and AGR excel in this field.

Yours faithfully
