

## AGR Consultancy Services track record: Clients

### **Maersk Oil North Sea UK Limited Drilling Superintendent Mar 2009**

Having worked through AGR for over ten years and hired their consultants for a number of years as drilling supervisors, drilling engineers and materials/logistics controllers, I can say that I have always been very satisfied with the quality of the representation of myself and their other consultants to the client companies. The level of experience of the consultants has always been correctly assessed and represented along with the correct market rate for remuneration. Administration of the contract and client feedback on the performance of the consultant has been very good and any queries followed up promptly.

### **CNR International Manager Drilling and Completions, UK and International**

AGR has, over a number of years, proven a consistent and reliable provider of quality consultant personnel to CNR International. Consultants have been sourced to fill a wide variety of roles in drilling, completions, subsea and testing, both in UKCS and West Africa. The consultancy advisors at AGR have always been quick to respond to requirements of CNRI and have provided a high quality and professional service.

### **Oilexco North Sea Ltd VP Drilling & Completions Mar 2009**

AGR Consultancy Services has provided the majority of our consultant engineers and supervisors over the last 4 years. They have provided a consistently high level of support, from the initial placement ensuring that the correct individual is matched to our role requirements to ongoing discussions as operations and roles/responsibilities evolve. A key differentiator for AGR is that they do not just submit a raft of CVs for a position but use their experience and knowledge of the consultants to provide an individual that can fulfil the role and deliver the results expected.

**“Don’t take our word for it. Listen to our clients and consultants. Our testimonials and case studies will tell you everything you need to know.”**

# AGR Consultancy Services track record: Consultants

## Project Manager Shell Aberdeen

AGR is an exceptional recruitment company. The client had been looking to fill a particularly stringent set of requirements and AGR had clearly done their homework before contacting me, matching my skills, experience and requirements with those of the client. Friendly, efficient, ethical and discreet, they managed the whole process of interview through to contract sign-off perfectly. Invoices have been paid promptly and accurately. Overall they have provided a highly professional service that I would recommend to clients and job seekers alike.

## Drilling Supervisor - MSL Libya

I have enjoyed working together with you and have always been treated as one of the family and part of the team, not just a number on the list. Please pass on my thanks to your management team and tell them how happy I am working with good people.

## Drilling Logistics / Materials Manager - UK

You always get the head thinking when you call as you always have different opportunities and good locations.

## Senior Drilling Engineer - BG Tunisia

Please keep me informed. I really liked working with you, and I think you are the most professional agent I have worked with.

## Drilling Superintendent - Ghana

During the last 10 years, I have had nothing but excellent help and support in finding work, securing competitive contract terms and conditions and importantly, being paid promptly. Any dealings with AGR personnel have always been dealt with promptly and efficiently, which is another important aspect of their service.

The AGR team has a global network that they can call upon to assist in generally ensuring that consultants can be presented with choices when it comes to their job placements. In summary, the AGR Team supply a very competent and professional service, setting the benchmark for other consultancies.

## Senior Drilling Supervisor - Kazakhstan

On many levels AGR consistently delivers the usual suite of consultant requirements to a very reliable standard; contract negotiations, invoicing and payment etc, but what sets them apart is their willingness to tackle the non-routine (keeping my family informed, last minute itinerary changes, bank transfers, dealing with in-country agencies and local authorities) and making sure that as far as possible the hassle factor is reduced to zero.

At the end of the day I get first class professional service and support, dealt with personally by someone who knows completely what the score is.
