

AGR Petroleum Services provides whole drilling teams to support multi-well multi-client rig campaigns.

CHALLENGE

Licensed operators often find it economically or logistically advantageous to form a drilling consortium to share the rig and associated expenses. As a result, they need complete drilling teams to help them to plan and execute their drilling programme. In 2008, AGR Consultancy Services was engaged to provide complete drilling teams to support three simultaneous rig campaigns.

Complicating Factors

- Scarcity of qualified personnel.
- Time pressure to assemble staff to support 3 simultaneous rig campaigns.

RESULT

The consultancy group leveraged its excellent relationships with its consultants to provide complete teams to all three rig operators within the desired cost and time parameters resulting in the following benefits:

- Continuous experience on the same rig.
- Fixed contractor rates.
- Built-in synergy between team members, thereby facilitating communication and decision making.
