

Ready to Respond...

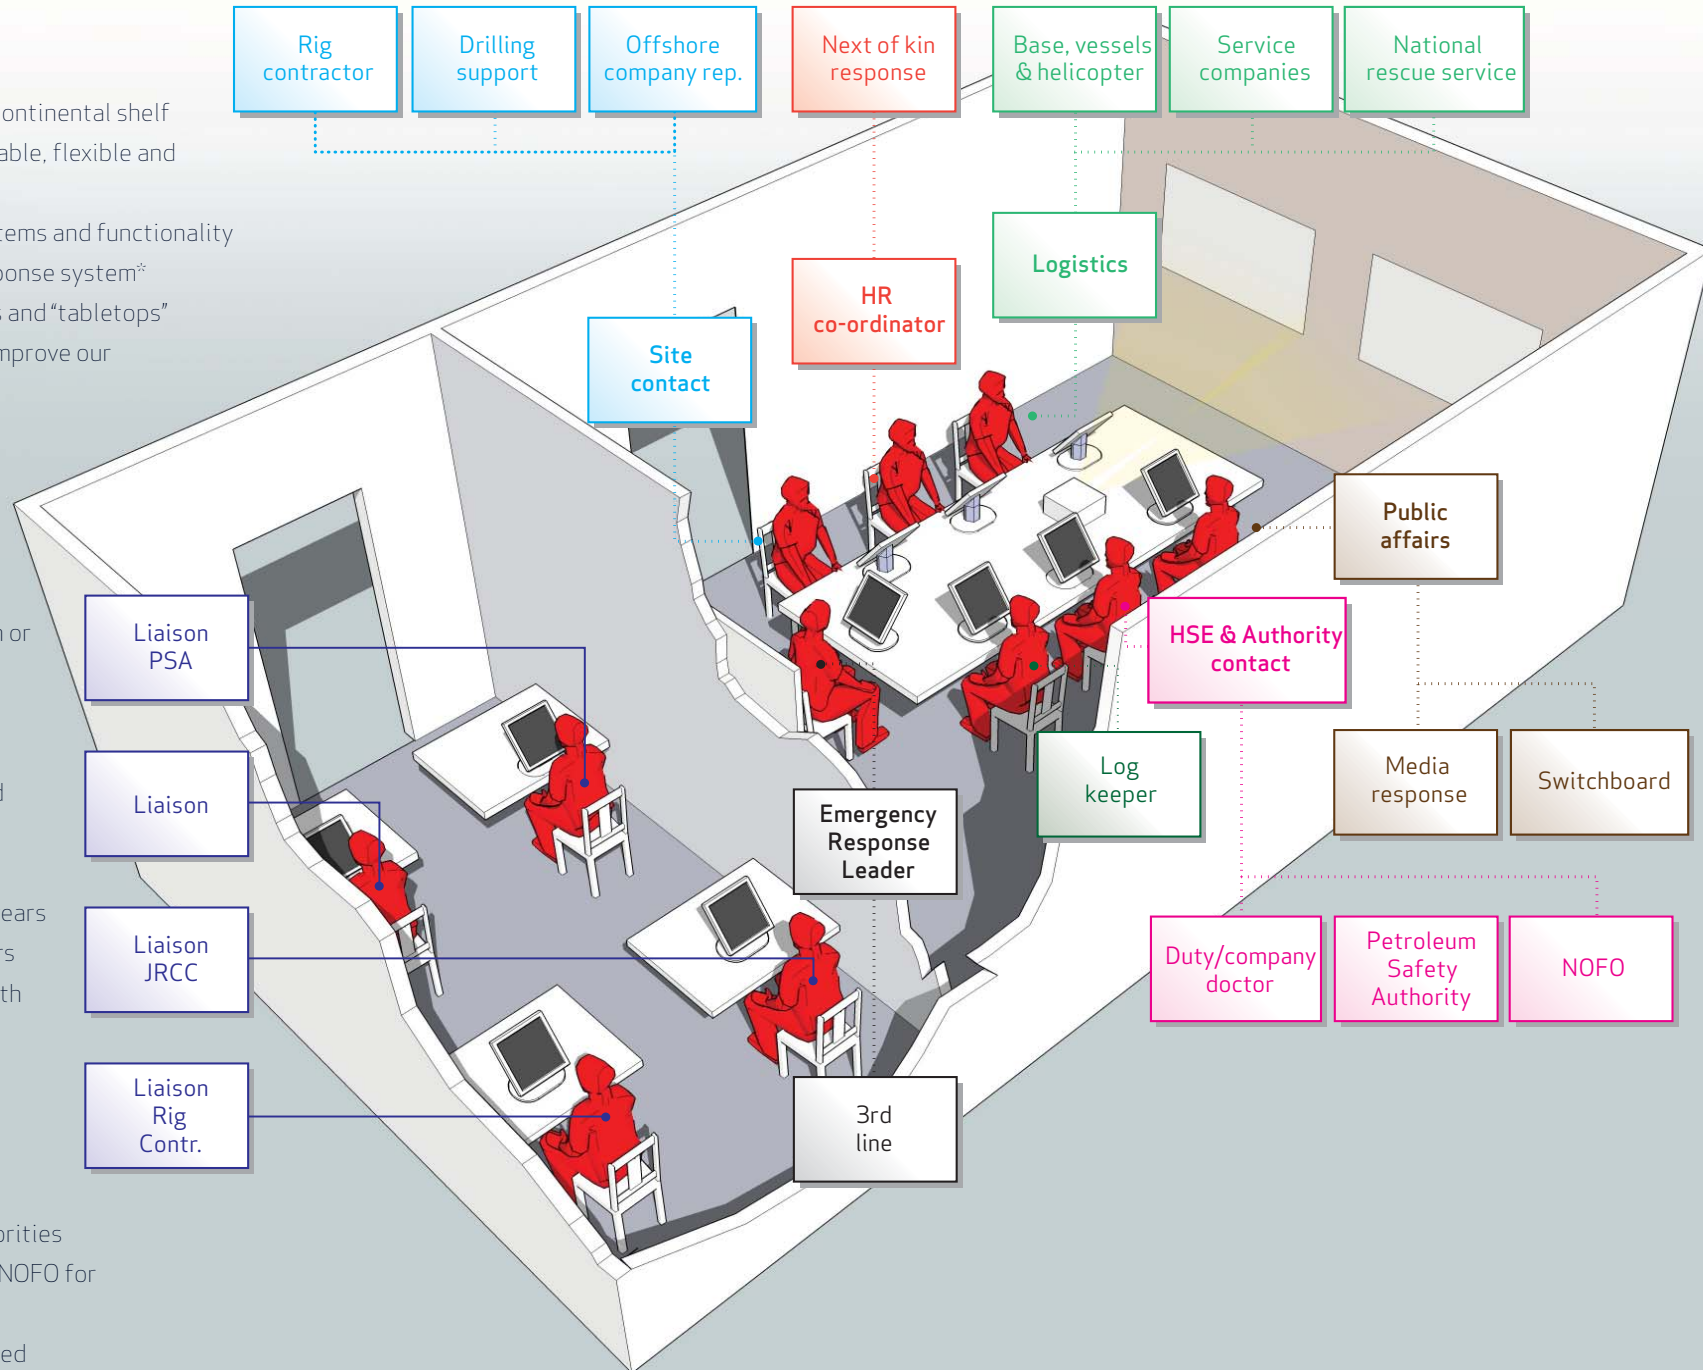

ERR and ERO set up at Skøyen

Did you know that:

- Several operators on the Norwegian continental shelf have acknowledged our centre as reliable, flexible and cost-effective
- PSA has successfully audited our systems and functionality
- We have a web-based emergency response system*
- We conduct training, emergency drills and “tabletops” regularly to verify and continuously improve our emergency preparedness skills

Features & Benefits:

- Flexible solutions that can be customised to the operator’s needs
- Proactive handling of incidents to ensure preparation for any escalation or development in the situation
- An emergency response system that handles personnel, the environment, assets and operations, next of kin and the media
- 24/7 fully-trained duty organization
- Experienced gained through several years of operations with different Operators
- Seamless interfacing by our teams with the operators’ offshore and onshore organisation
- Web-based information system for realtime response and overview and documentation*
- Compliance with the Norwegian authorities
- Close cooperation with the JRCC and NOFO for efficient operations
- Emergency plans developed as required

*Fully operational January 2010.
