

## AGR prepares annual reserves reporting for DONG.

### CHALLENGE

AGR was tasked with ensuring that DONG was in compliance with SPE/WPC and SEC rules with regard to the reporting of annual reserves.

#### Complicating factors

- DONG had recently implemented new reserves definitions to comply with SPE standards.
- There was an additional requirement to report SEC compliant reserves, a task that DONG had not previously undertaken.

### RESULT

AGR reviewed all DONG's producing assets and prepared SEC-compliant reserves figures for these. AGR furthermore recommended certain modifications to be made to the incumbent reserves definitions and reporting system in order to ensure that, in the future, SEC-compliant reserves could be estimated and reported efficiently.

AGR also provided technical and commercial specialists to join DONG's reserves auditing team to ensure that the annual preparation of reserves was consistent with its internal definitions and was technically and commercially robust.
