

# AGR drills eight production wells in the Volve field ahead of budget

photo: Colin H.F. Dobinson - Statoil

## OVERVIEW

AGR was assigned by Statoil to deliver Well Management services for the second drilling campaign on the Volve field. Operations were executed between September 2012 and May 2014. This was the first time Statoil used an independent well management company. The operation was conducted using Jack-up rig, Maersk Inspirer.

## CHALLENGE

- Postponed start up of the operations due to late equipment deliveries
- Drilling unit cold-stacked for three years before kick off of operations
- ARIS introduced as new governing documentation across entire Statoil organisation
- Simultaneous operations – drilling and production with limited space for personnel and equipment
- Production culture vs. Drilling culture
- Short deadlines and dynamic planning based on the outcome of the pilot wells

# AGR drills eight production wells in the Volve field ahead of budget

## VALUE ADDED

Using its drilling experience from over 500 completed well projects, the AGR team delivered increased value to the client:

- 8 wells drilled in 390 days – 85 days ahead of budget in comparison with the 1st drilling campaign
- All 8 wells delivered with continuous excellent performance, all 8 wells ahead of budget
- 2 slot recoveries and 4 well completions successfully performed
- Increased oil production by +/- 17.000 BOPD, 5 Mio BOE in total
- “Rig of the Month” development – Best in class - from cold rig to 3rd in 8 months
- Excellent cooperation between Statoil PeTek and AGR’s Well Management teams
- No LTI or serious spills

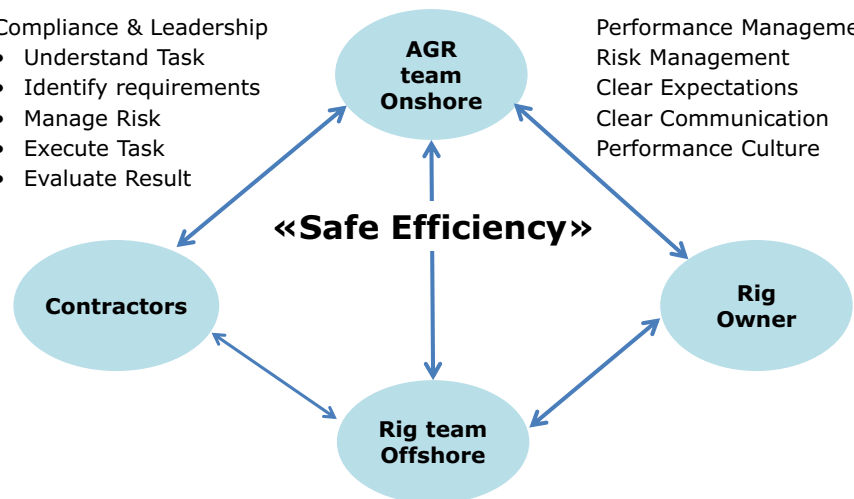

## AGR WM Contributions to Efficient Drilling Operations

### Compliance & Leadership

- Understand Task
- Identify requirements
- Manage Risk
- Execute Task
- Evaluate Result

### Performance Management

- Risk Management
- Clear Expectations
- Clear Communication
- Performance Culture
