

## Supporting A&D in Africa

AGR's TRACS Evaluations provide a range of services to support Acquisition and Divestment (A&D) opportunities. Our activities in Africa span 20 years and 15 countries, working both onshore and offshore. We evaluate single assets or portfolios and will highlight technical and non-technical risks as well as commercial and strategic opportunities.

### SERVICES

TRACS Evaluations provide a broad range of services to support A&D opportunities:

- Asset and Portfolio Valuations
- Competent Person's Reports
- Due Diligence
- Reserves Audits

We use integrated teams of sub-surface and commercial experts to carry out resource valuations and classifications. Evaluation teams can be supplemented by drilling and facilities engineers from within AGR. Our multi-disciplinary teams have the breadth and depth of knowledge to provide the technical and economic assessment needed to support the Due Diligence process. This approach is aimed at providing a comprehensive assessment of the technical and commercial risks and opportunities. We also provide independent advice to buyers and brokers on less tangible aspects such as operator competence, partner issues and other opportunities within the region.

### EXPERIENCE

Our technical and commercial experts have on average more than 20 years' experience in the E&P industry. From North Africa, throughout West Africa and down to South Africa, we have the expertise to progress your opportunity in the A&D market.

*"Development drilling and early production showed that fractures were much more important than expected in our offshore field. We needed technical analysis and a new reservoir model so we turned to AGR and they delivered."*

Richard Steele, *Head of Development Geoscience, BG Group.*
