

North Sea.

AGR Integrated Logistics Solutions provide reliable logistics, procurement and drilling cost control support for international oil and gas projects. We have provided on and offshore support in wide-ranging locations but none more than the North Sea.

The North Sea is one of the most challenging and hostile working environments for the Oil and gas sector in the world – an area that AGR has vast experience in.

Our experience in finding the most cost effective solutions and delivery of projects to schedule is second to none.

THE SOLUTION

Supply vessels – AGR compete in a very competitive market to seek the most cost efficient vessels. We can source a vessel for our clients that can cope with the harshest of North Sea conditions.

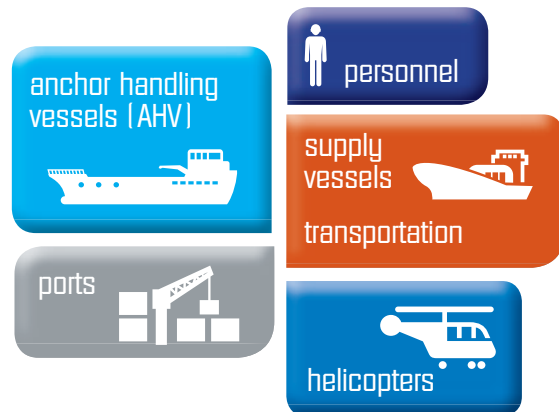

Anchor Handling Vessels (AHV) – AGR will also supplement the supply vessels with AHV's to handle anchors for oil rigs, to tow them to location and anchor up. This can also serve as an Emergency Rescue and Recovery Vessel (ERRV) and/or be used to transport supplies to and from the offshore drilling rig.

Ports – From the busy ports of Aberdeen and Peterhead on the mainland to the smaller ports of Lerwick and Scatsta on the Islands, AGR have experience with all major ports that can service the North Sea & West of Shetland sectors.

Helicopters – AGR will source the most efficient helicopters for our clients to support the drilling campaign in the safest and most cost effective way. AGR can take responsibility for all service company and rig contractor personnel using industry accepted personnel tracking system (OPMS).

AGR has drilled over 500 wells in 25 countries, over 6 continents, for 106 clients since 2000.

Transport – AGR look to identify best practice and cost savings on all transportation for our clients. These savings can be made due to our geographic proximity to the North Sea sector and also aids in increasing productivity of companies based in our area. AGR can also provide secure storage and fully certified cargo carrying units.

Personnel – Despite the current skill shortage in the industry, AGR, with the expertise of our in-house Consultancy division, endeavour to provide the best possible workforce capable to meet project requirements.
