

When there's no room for error.

AGR Integrated Logistics Solutions provide reliable logistics, procurement and drilling cost control support for international oil and gas projects.

AGR Integrated Logistics Solutions team provides a complete supply-chain solution to ensure no rig downtime occurs due to delayed equipment and materials.

Oil and gas project supply chains can be vast in scope and can involve multiple suppliers. AGR can streamline the supply chain to improve the flow of materials needed for your project. Our team's extensive knowledge of the oil and gas industry and long-established relationships within mean that your equipment and supplies are delivered where you need them and when you need them.

We execute our unrivalled global planning and operational experience to solve your unique logistics and materials management challenges.

AGR has successfully drilled a well every 10 days since 2000. We have provided on and offshore logistics support in wide-ranging locations from the remote Falkland Islands, to more conventional North Sea operations.

AGR's Oil & Gas Project Support Services cover:

- UK and International Operations support
- Marine and Aviation support
- Personnel logistics
- Dedicated project personnel
- Procurement
- Ability to provide customs support
- Control of client inventory and storage
- Bespoke Materials Management software tool - M²[™]
- Drilling Cost Control

AGR Integrated Logistics Solutions team members include CILT chartered members and CIPS associates.

If you demand excellence for your oil and gas projects, contact AGR's expert team.
